Students today. At Ames Laboratory, we believe in the future of science, which means training students in the science we are doing right now. From undergraduate and community college students to faculty, we offer programs that INSPIRE minds about scientific discovery.

Science Undergraduate Laboratory Internship (SULI) – Our SULI internships support the advancement of undergraduates pursuing careers and graduate work in science and engineering. Go to: www.ameslab.gov/education/suli.

Visiting Faculty Program (VFP) – Ames Laboratory researchers are paired on research projects with faculty members and their students from institutions historically underrepresented in the research community. Go to: www.ameslab.gov/education/vfp.

Community College Internship (CCI) – We place community college students in technical-training internships in science, engineering and technology. Go to: www.ameslab.gov/education/cci.

Office of Science Graduate Student Research (SCGSR) – Outstanding graduate students receive supplemental awards to support their graduate thesis research opportunities. Go to: www.ameslab.gov/education/graduate-fellowship.

See our SULI, CCI and VFP videos at: www.ameslab.gov/education/videos

Your science career is just a click away.
